

amazon SALES REPORT

2010-
2017

presented by
Fasil Feroz

INTRODUCTION

This report looks at Amazon sales data to understand how products are performing and what factors are influencing sales. By analyzing key details like total sales, popular products, customer preferences, and trends over time, the goal is to find insights that can help improve business decisions. The report will help identify opportunities to boost sales, manage inventory better, and improve marketing strategies, ultimately supporting Amazon's growth and success.

02

OBJECTIVE

The objective of the project is to analyze Amazon Sales data to uncover trends, assess product performance, and understand customer preferences. It will help to reveal flaws in the business model or in the way that one is going about conducting business. By evaluating key metrics like sales volume, pricing, and inventory levels, the goal is to optimize marketing, and drive profitability through data-driven decisions.

PROBLEM STATEMENT

Sales management has gained importance to meet increasing competition and the need for improved methods of distribution to reduce cost and to increase profits. Sales management today is the most important function in a commercial and business enterprise. Do ETL: Extract-Transform-Load some Amazon dataset and find for me Sales-trend -> month-wise, year-wise, yearly_month-wise. Find key metrics and factors and show the meaningful relationships between attributes.

DETAILS OF DATA

TOTAL REVENUE BASED ON YEAR

2010 is the year where total revenue generated the most. 2011 is the year with least total revenue.

AVERAGE PROFIT IN REGION-WISE

'Middle East and North Africa' has the most profit compared to other regions.

TOTAL PROFIT BASED ON YEAR
